

Last Update Sept. 2007

Information SERVICE with specified LABEL

LabelTrace.net is an **OPEN** platform to provide online (Web and Mobile Web) label verification information for consumers and the tracing information reports to manufacturers / merchandise companies (vendors).

We provide 3 different kinds of services.

1) Standard Label and Verification Service

Manufacturers or merchandise companies (vendors) can place the order to us with the quantity of*standard Labeltrace labels and label numbers.

*Standard Labeltrace Label: Upon requested.

2) Customized Label and Verification Service

Vendors can choose or design their own label with the specified hologram label material/style with labeltrace's label numbers.

3) Verification Service --- Free* !!

Labeltrac.net will work with the vendors and provides them the tracing number with the Verification Service.

* For the detail of FREE tracing number, please contact us by email.

REQUIREMENTS for VENDORS in SERVICE

When the vendors use our label verification service, the vendors must agree that **ONLY** one label number putting on one item of the merchandise. They can't use the label number more than one time and more than one different item.

Labeltrace.net will request the vendors to issue the official documents to us, of acknowledging the assigned label numbers and the requirements for one label number on one item of merchandise **ONLY** and no more than one time usage.

INTEGRITY and CREDIBILITY SERVICE

Once we get the label number order from vendors, those label number will be documented and strictly assigned to the name of vendor. Labeltrace.net will maintain those records of assigned label number permanently in our data base file.

Labeltrace.net will arrange the CPA company or the third independent / authorized institution to review or audit the vendors' label number documents and the assigned label number record in the end of every financial year.

Integrated Label Tracing System (ILTS) (www.ilts-demo.com)

- Integrated Label Tracing System (ILTS) is an add-on information platform for the manufacturer/merchandise company (vendor) which can combines with their existing web system.
- The function of ILTS is allowing the consumers to directly verify the label number in the vendors' web site. And the vendors can have the real control for the label tracing information by themselves.
- Labeltrace.net will provide the seamless solution for putting ILTS and vendors' web system together.
